Regional Airport

Burlington, Iowa

Wednesday

August 27, 2003

7:00 PM

PROGRAM

This Aviation Safety Education Seminar is FREE and also counts as one of the requirements for the WINGS program.

BRING A FRIEND

SURFACE SAFETY OPERATIONS AT NON-TOWERED AIRPORTS

Presented by: Central Region Runway Safety Staff

Pilots that operate mainly at non-towered airports may have thought we forgot you last year when we presented Runway Safety Operations at Towered Airports. Well, we didn't! This year we will feature life saving seminars focused on Runway Safety at Non-Towered airports.

Come hear how to safely operate at a non-controlled airport. Meet the local airport personnel and the Regional and Local FAA FSDO representatives. You will be given the latest information on Runway Safety and trained on the latest best practices. Every attendee will receive a copy of the latest training CD on Surface Safety Operation. This CD was a year in the making and is designed as a self paced training tool for all experience levels. Don't miss out on obtaining this great training devise.

FLIGHT INSTRUCTORS: It is very important that you bring your students to this seminar. On all future biennial flight reviews (BFR) applicants will be tested on runway safety.
